PostgreSQL come Oracle 11g con le funzionalità di replica in streaming e Hot Standby

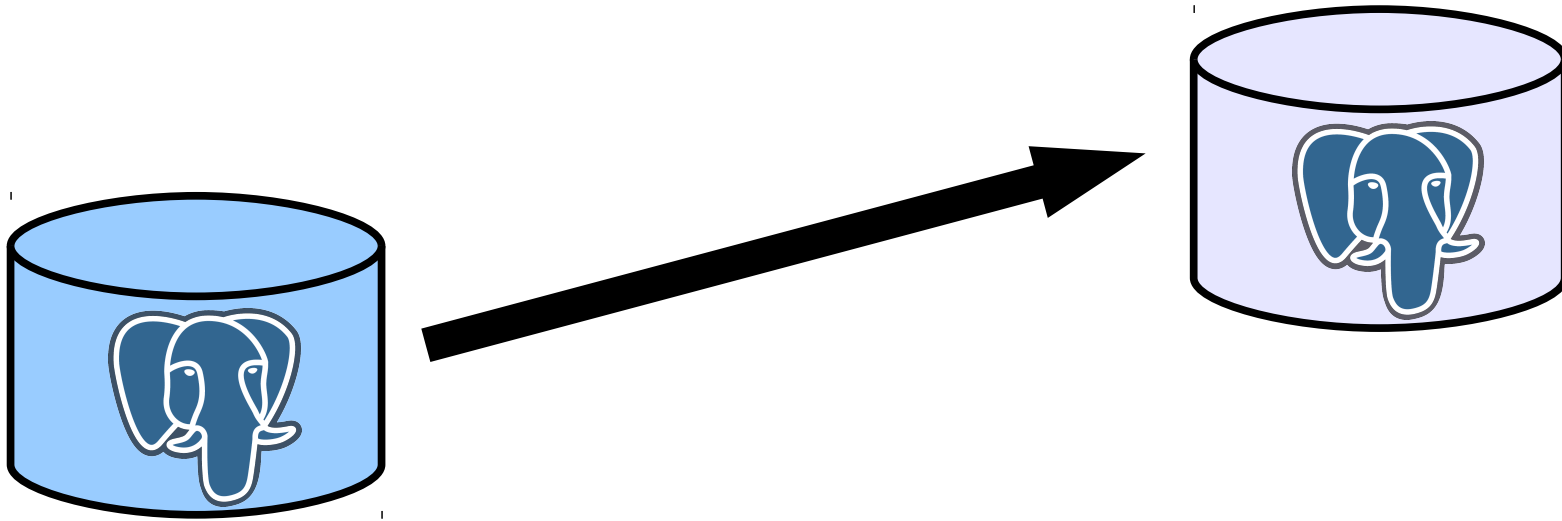

Pubblicato il 13/07/2010 | da Ingrid Marson

La prossima versione del database open source PostgreSQL, la cui uscita

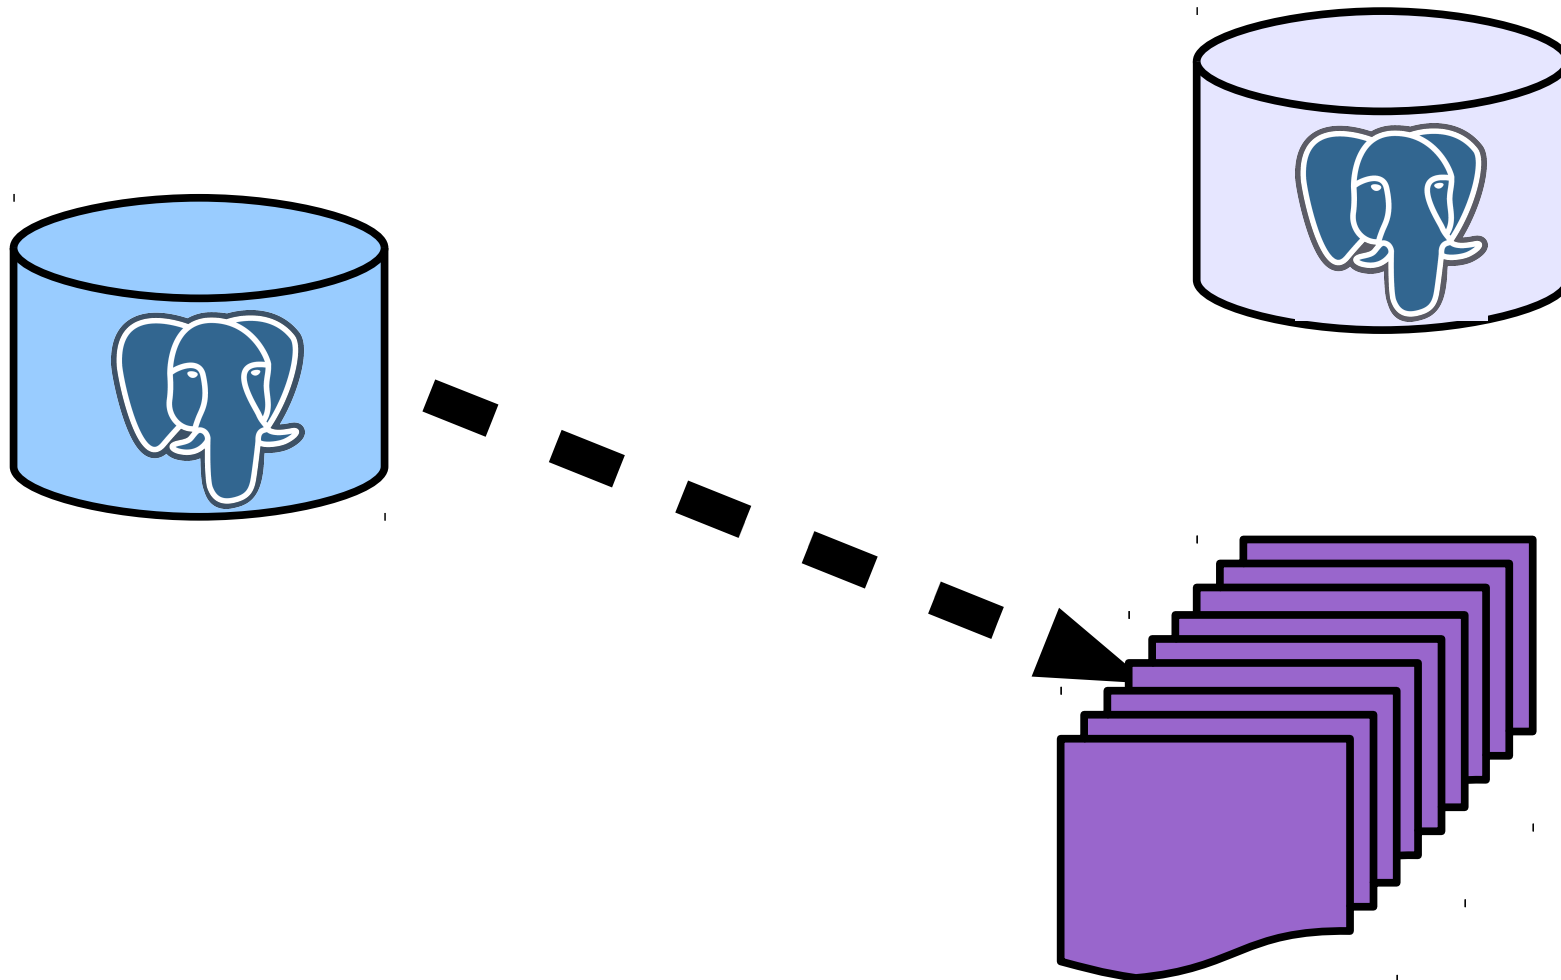

Hot Standby

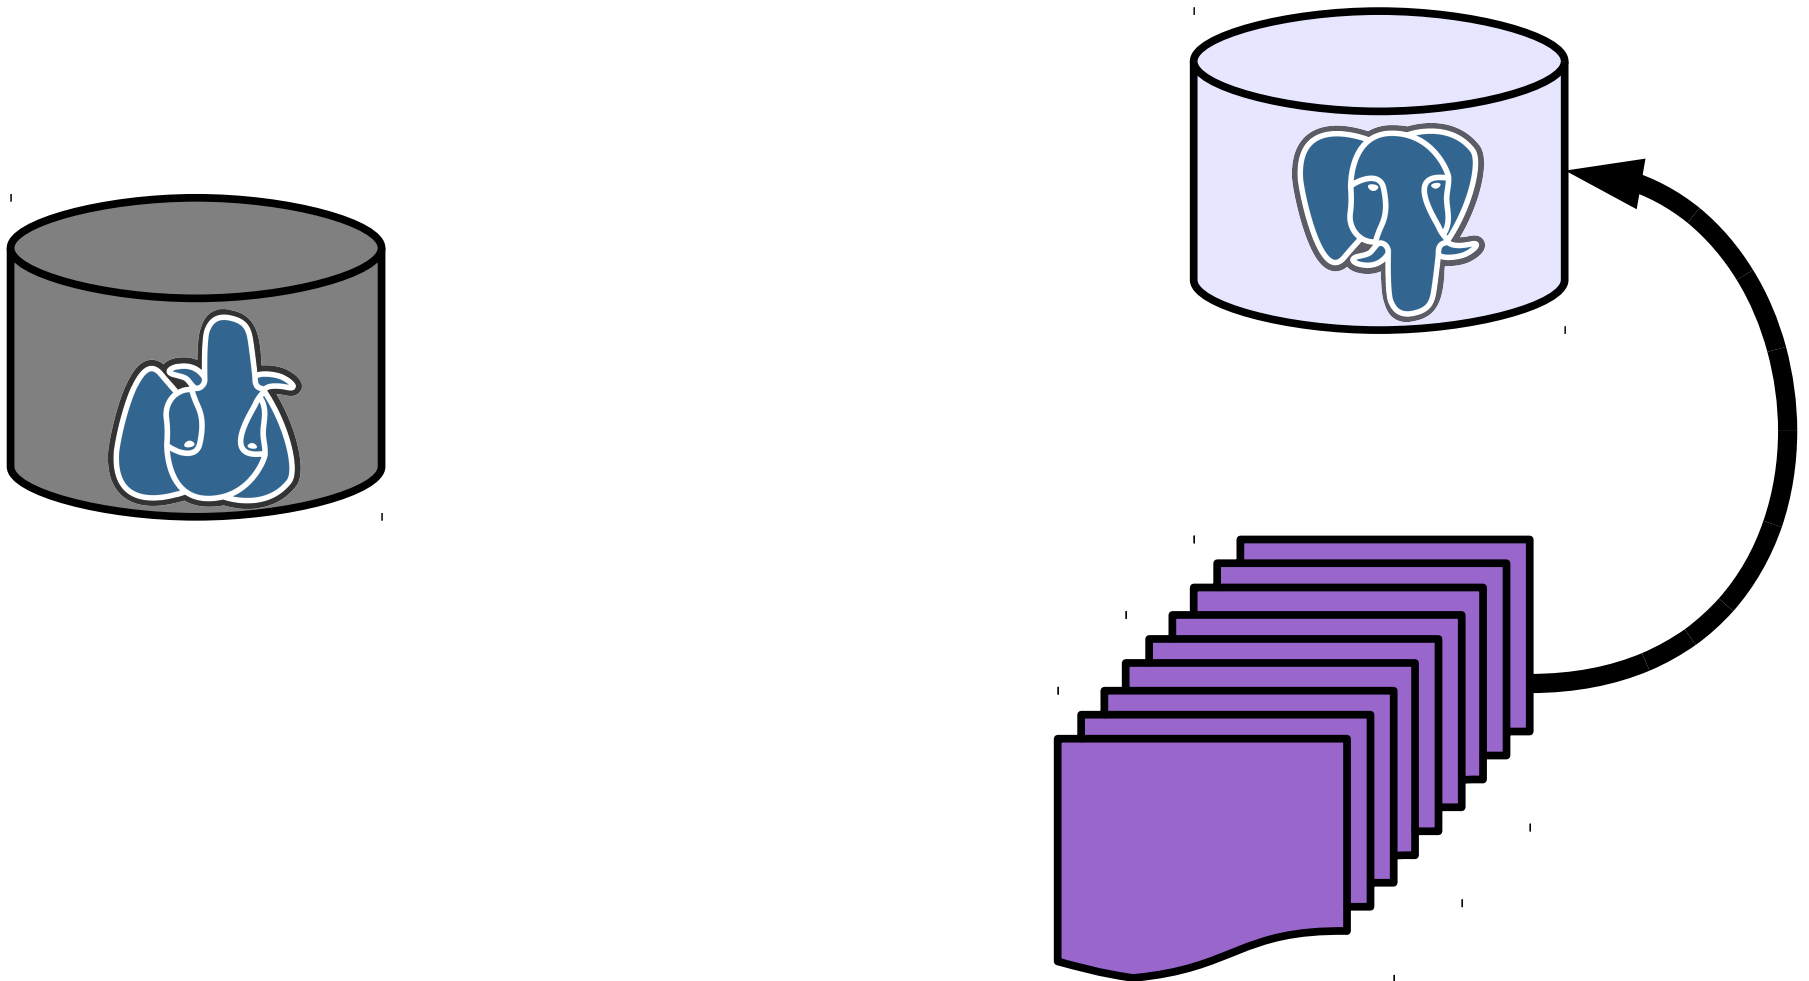

8.0: Point-In-Time Recovery (PITR)

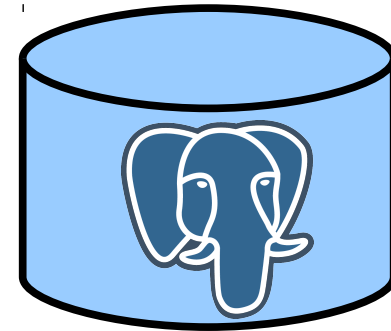

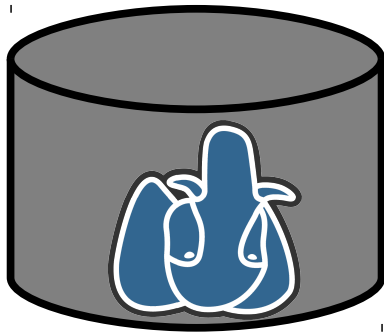

8.0: Point-In-Time Recovery (PITR)

8.0: Point-In-Time Recovery (PITR)

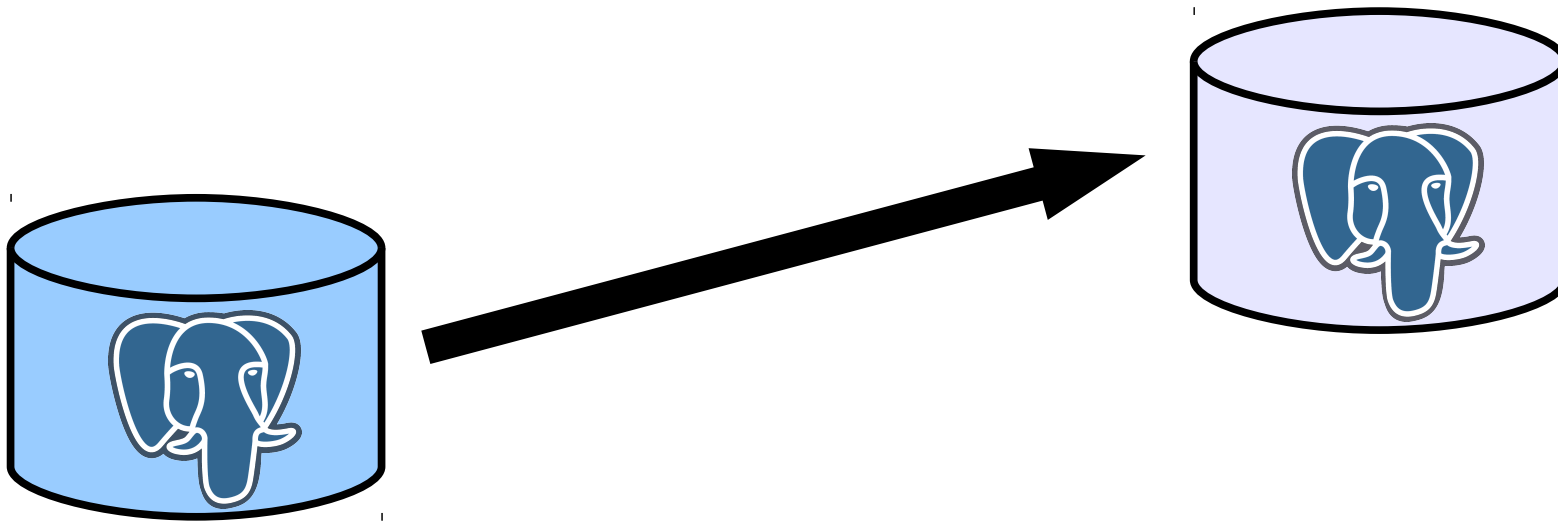

8.0: Point-In-Time Recovery (PITR)

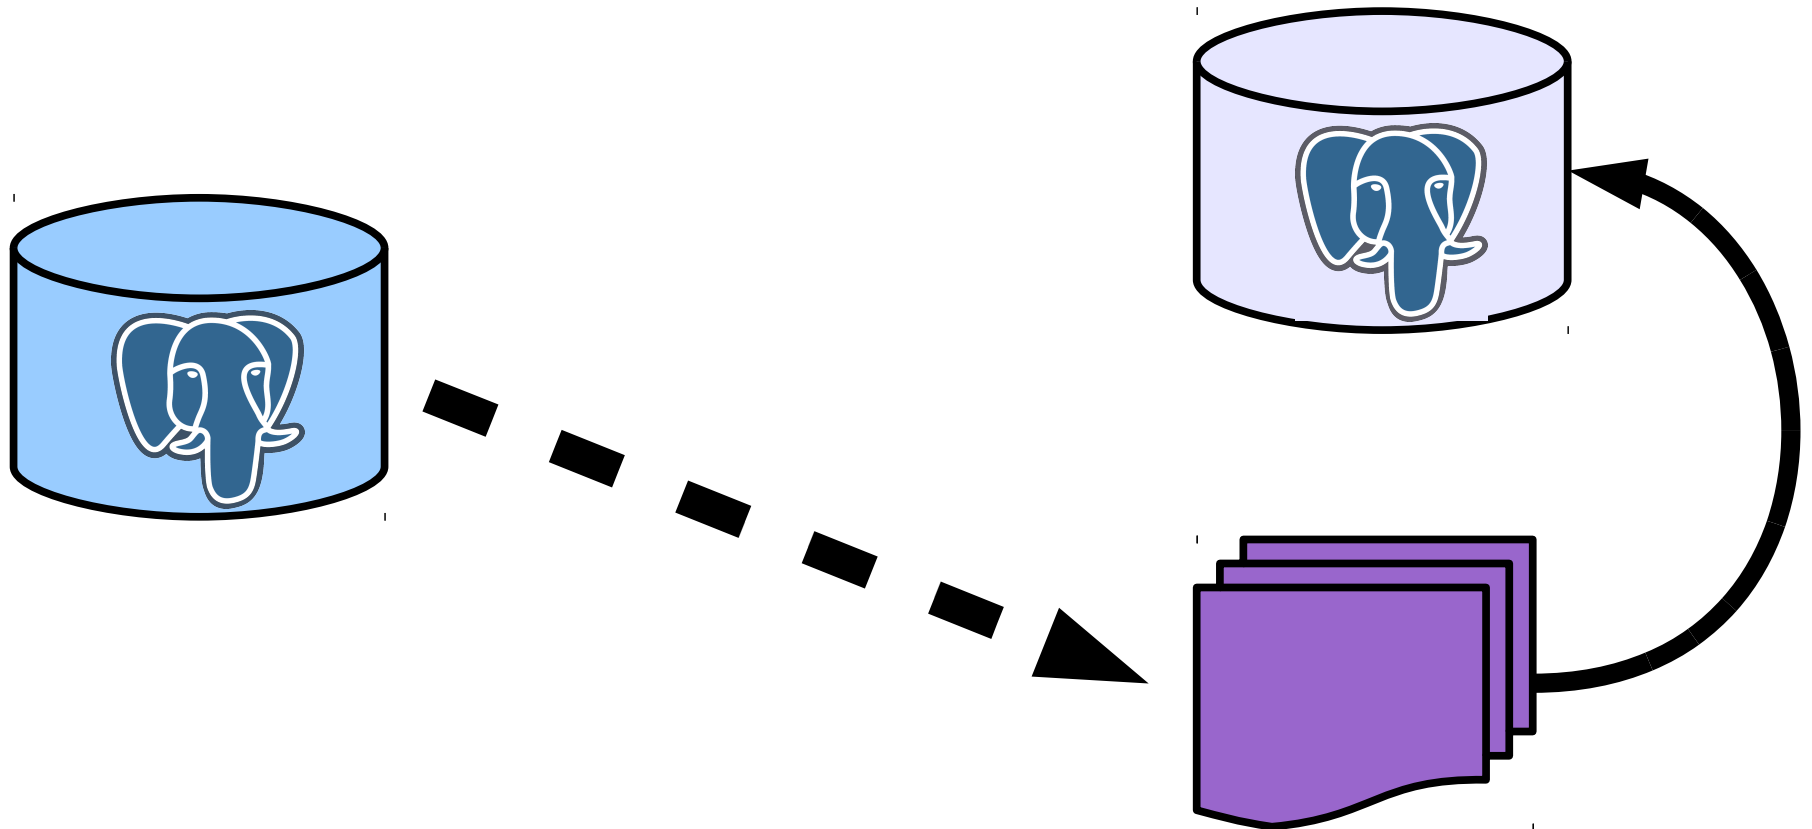

10 minutes to hours

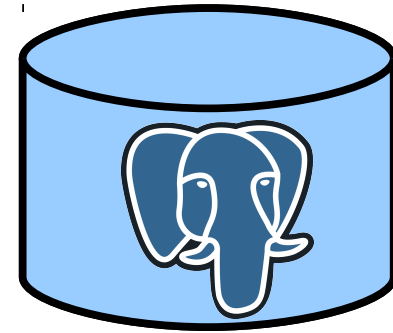

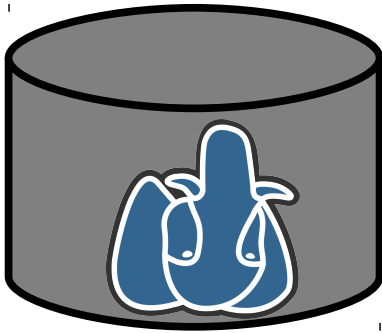

8.3: Warm Standby

8.3: Warm Standby

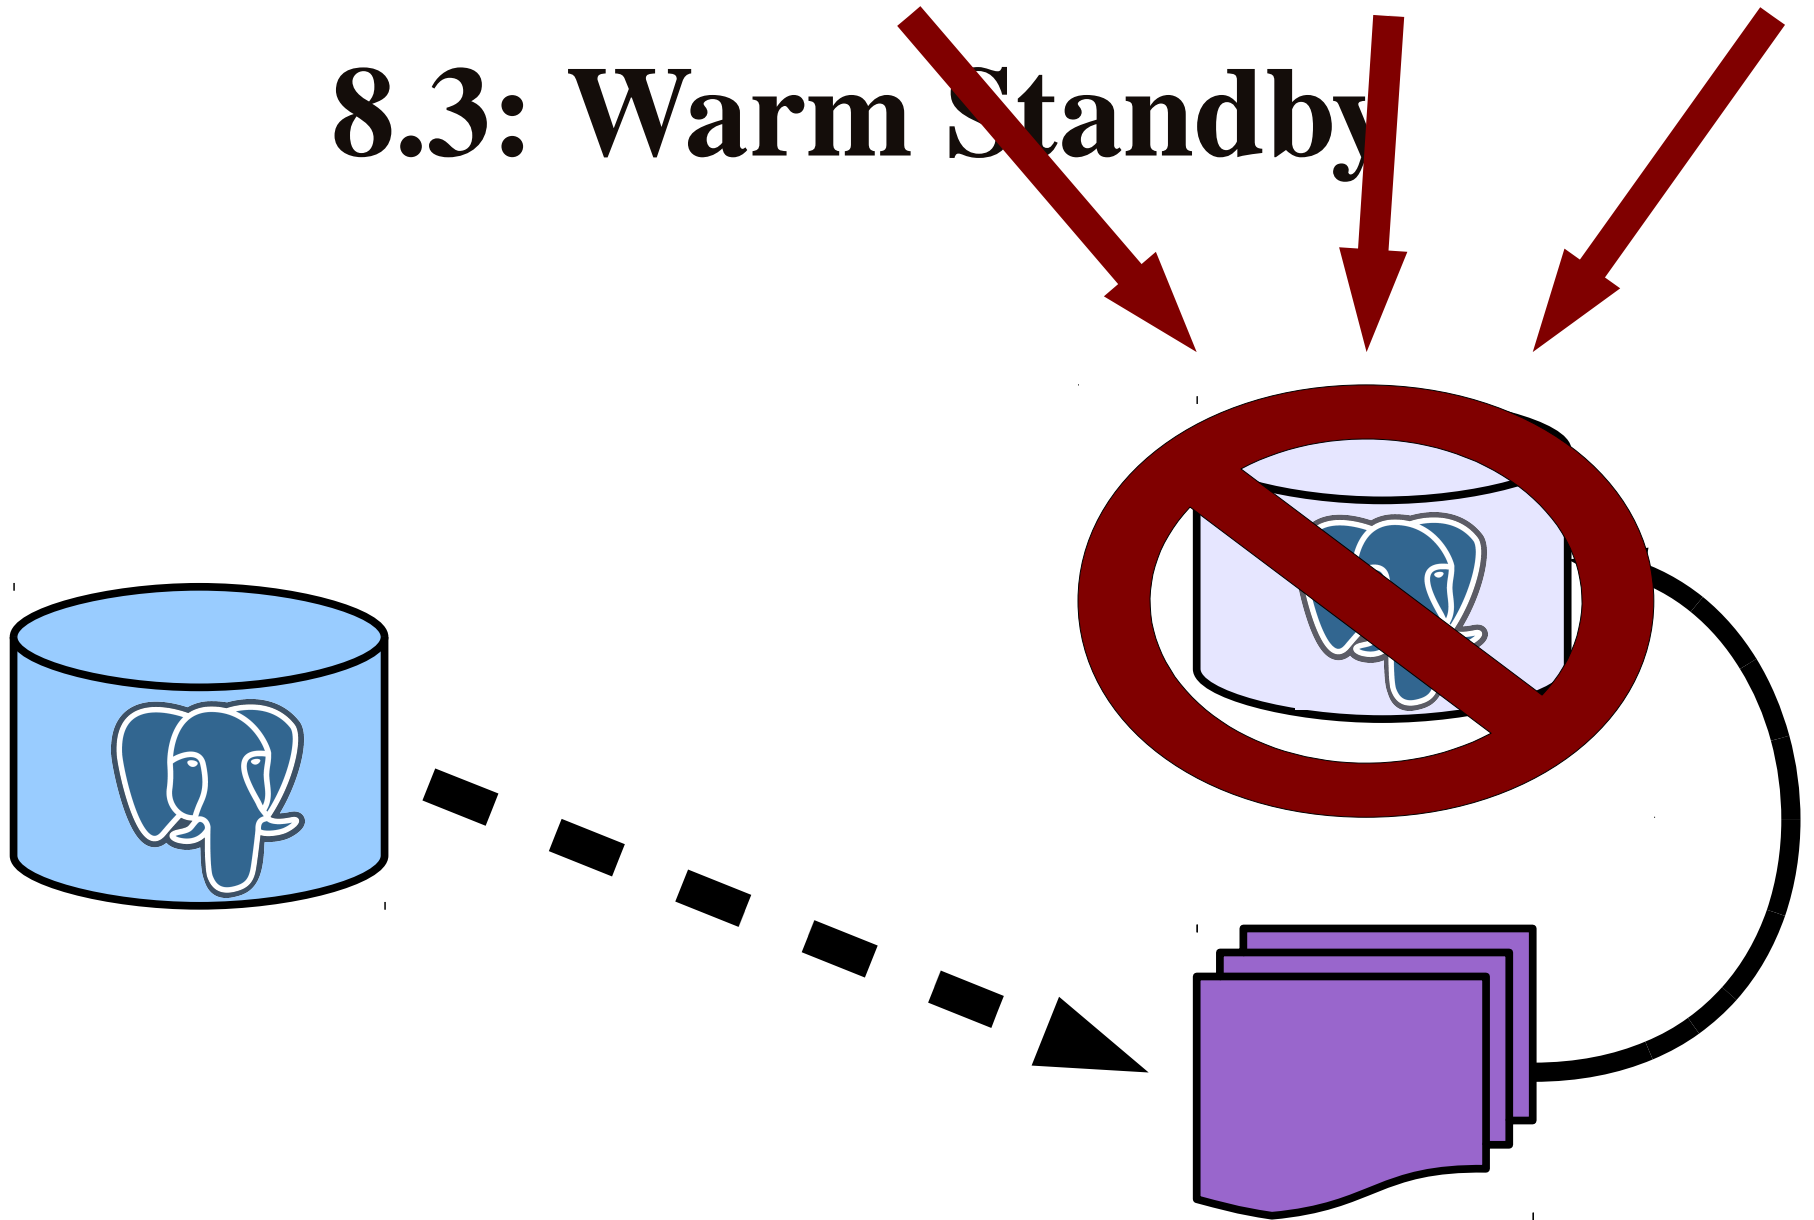

8.3: Warm Standby

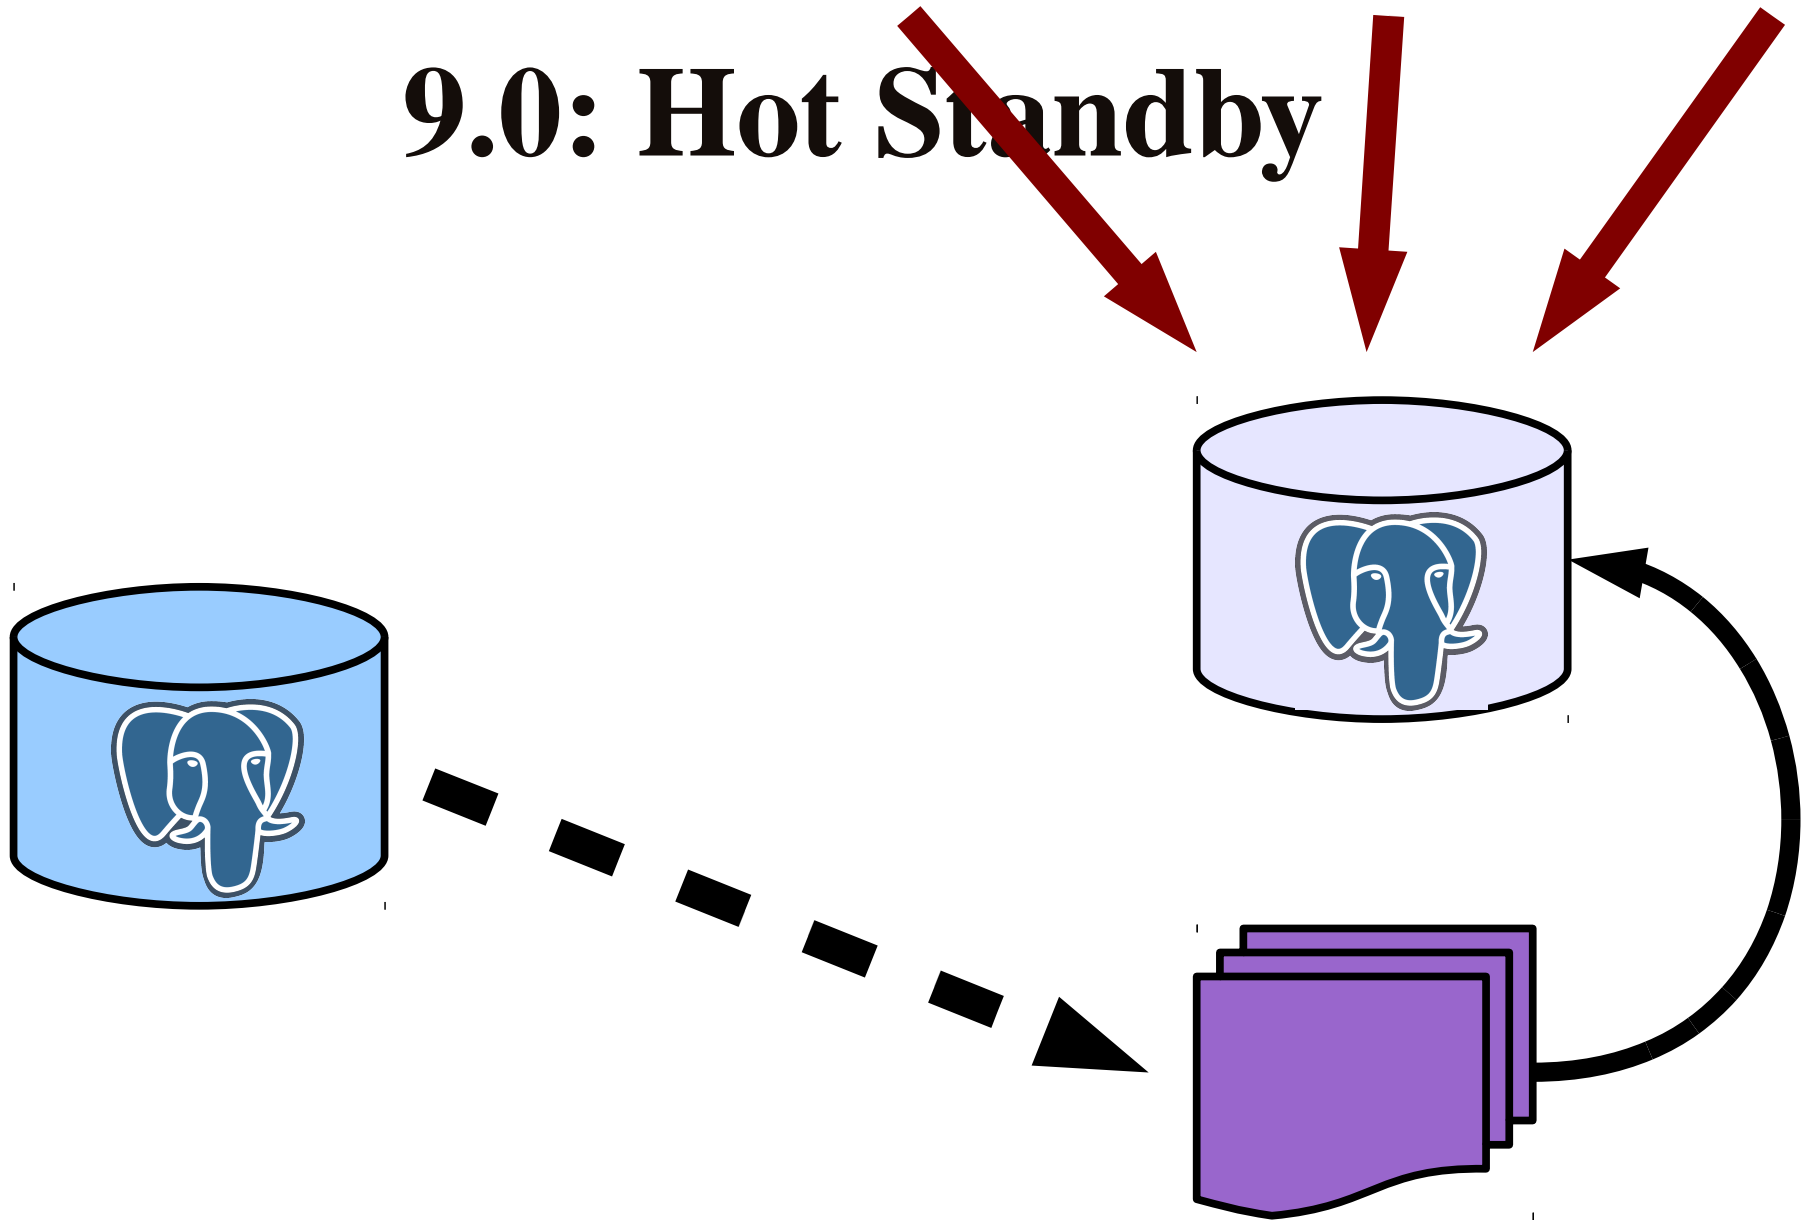

seconds to minutes

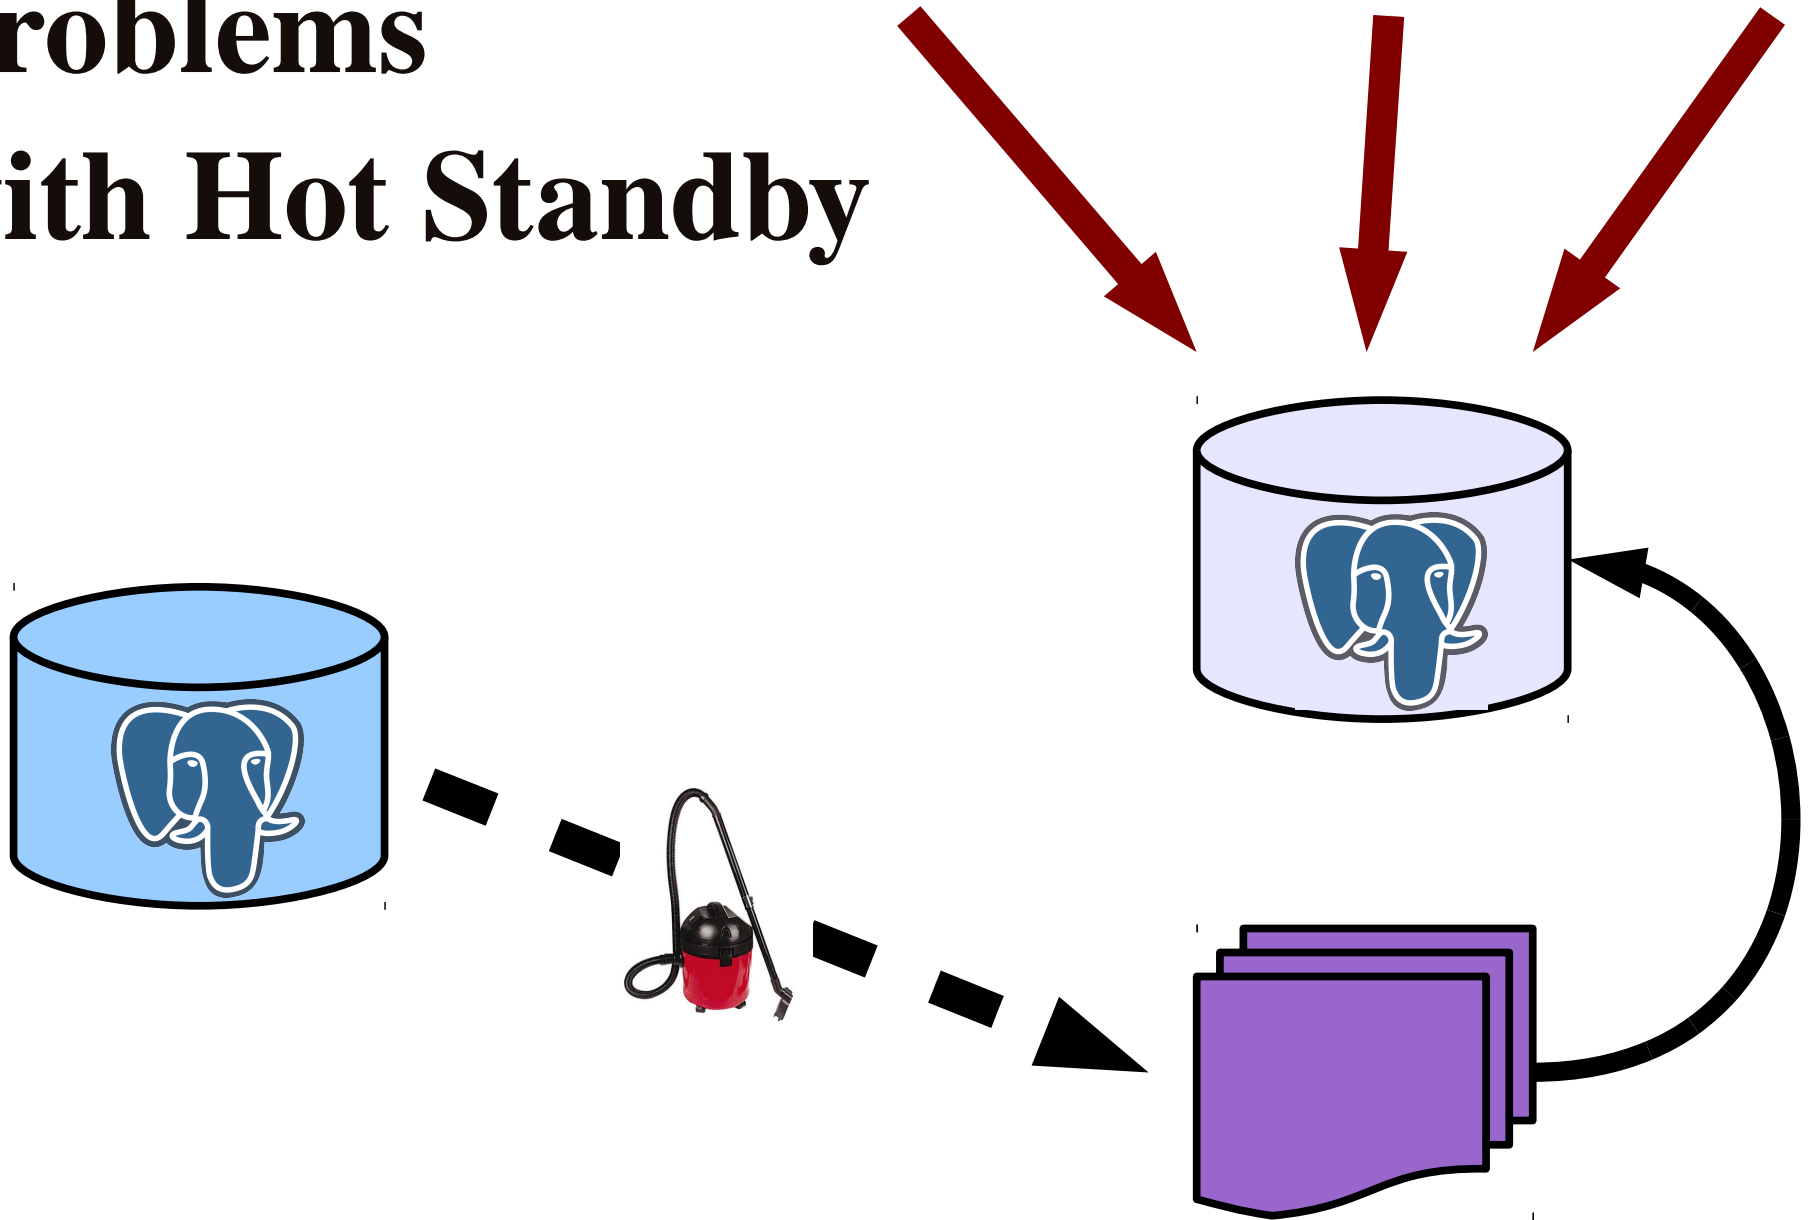

8.3: Warm Standby

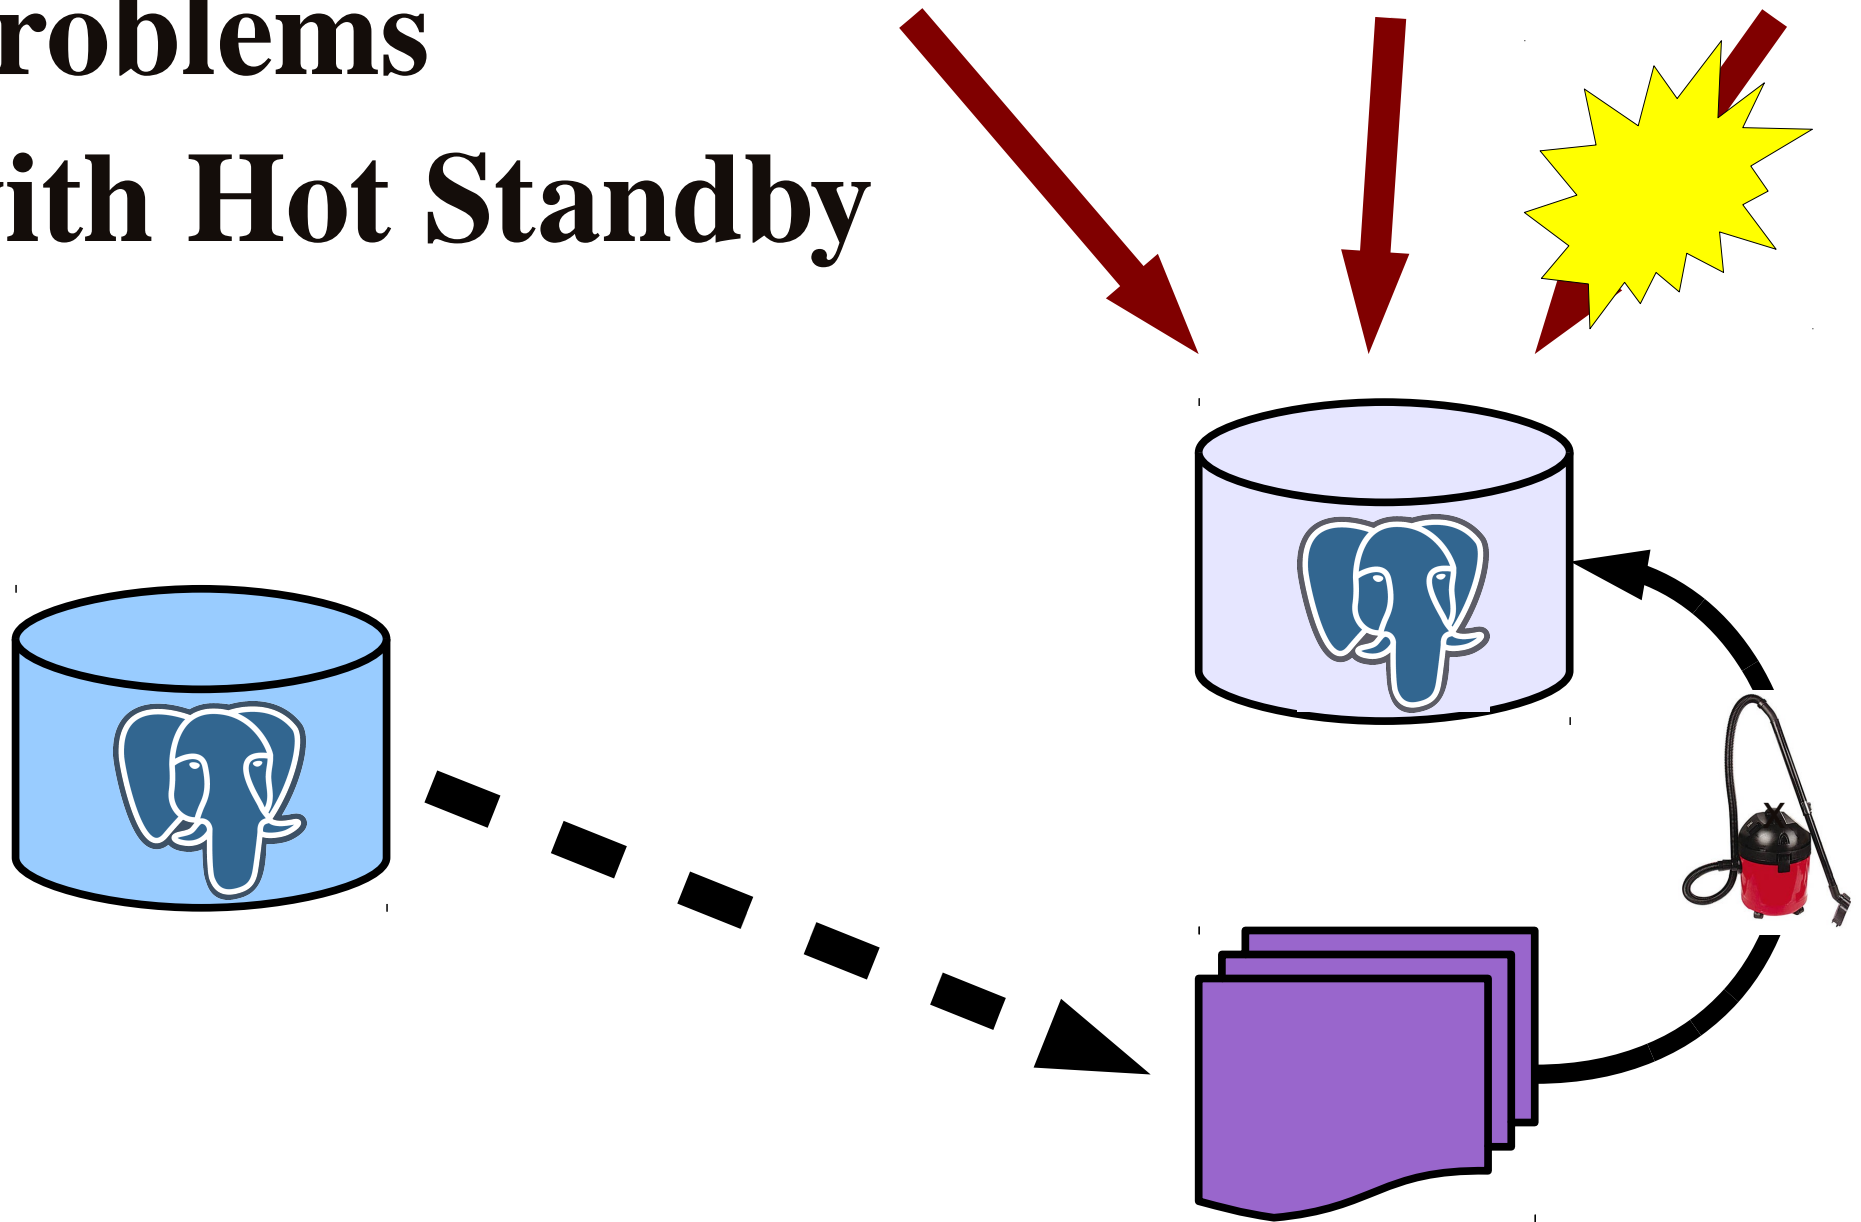

9.0: Hot Standby

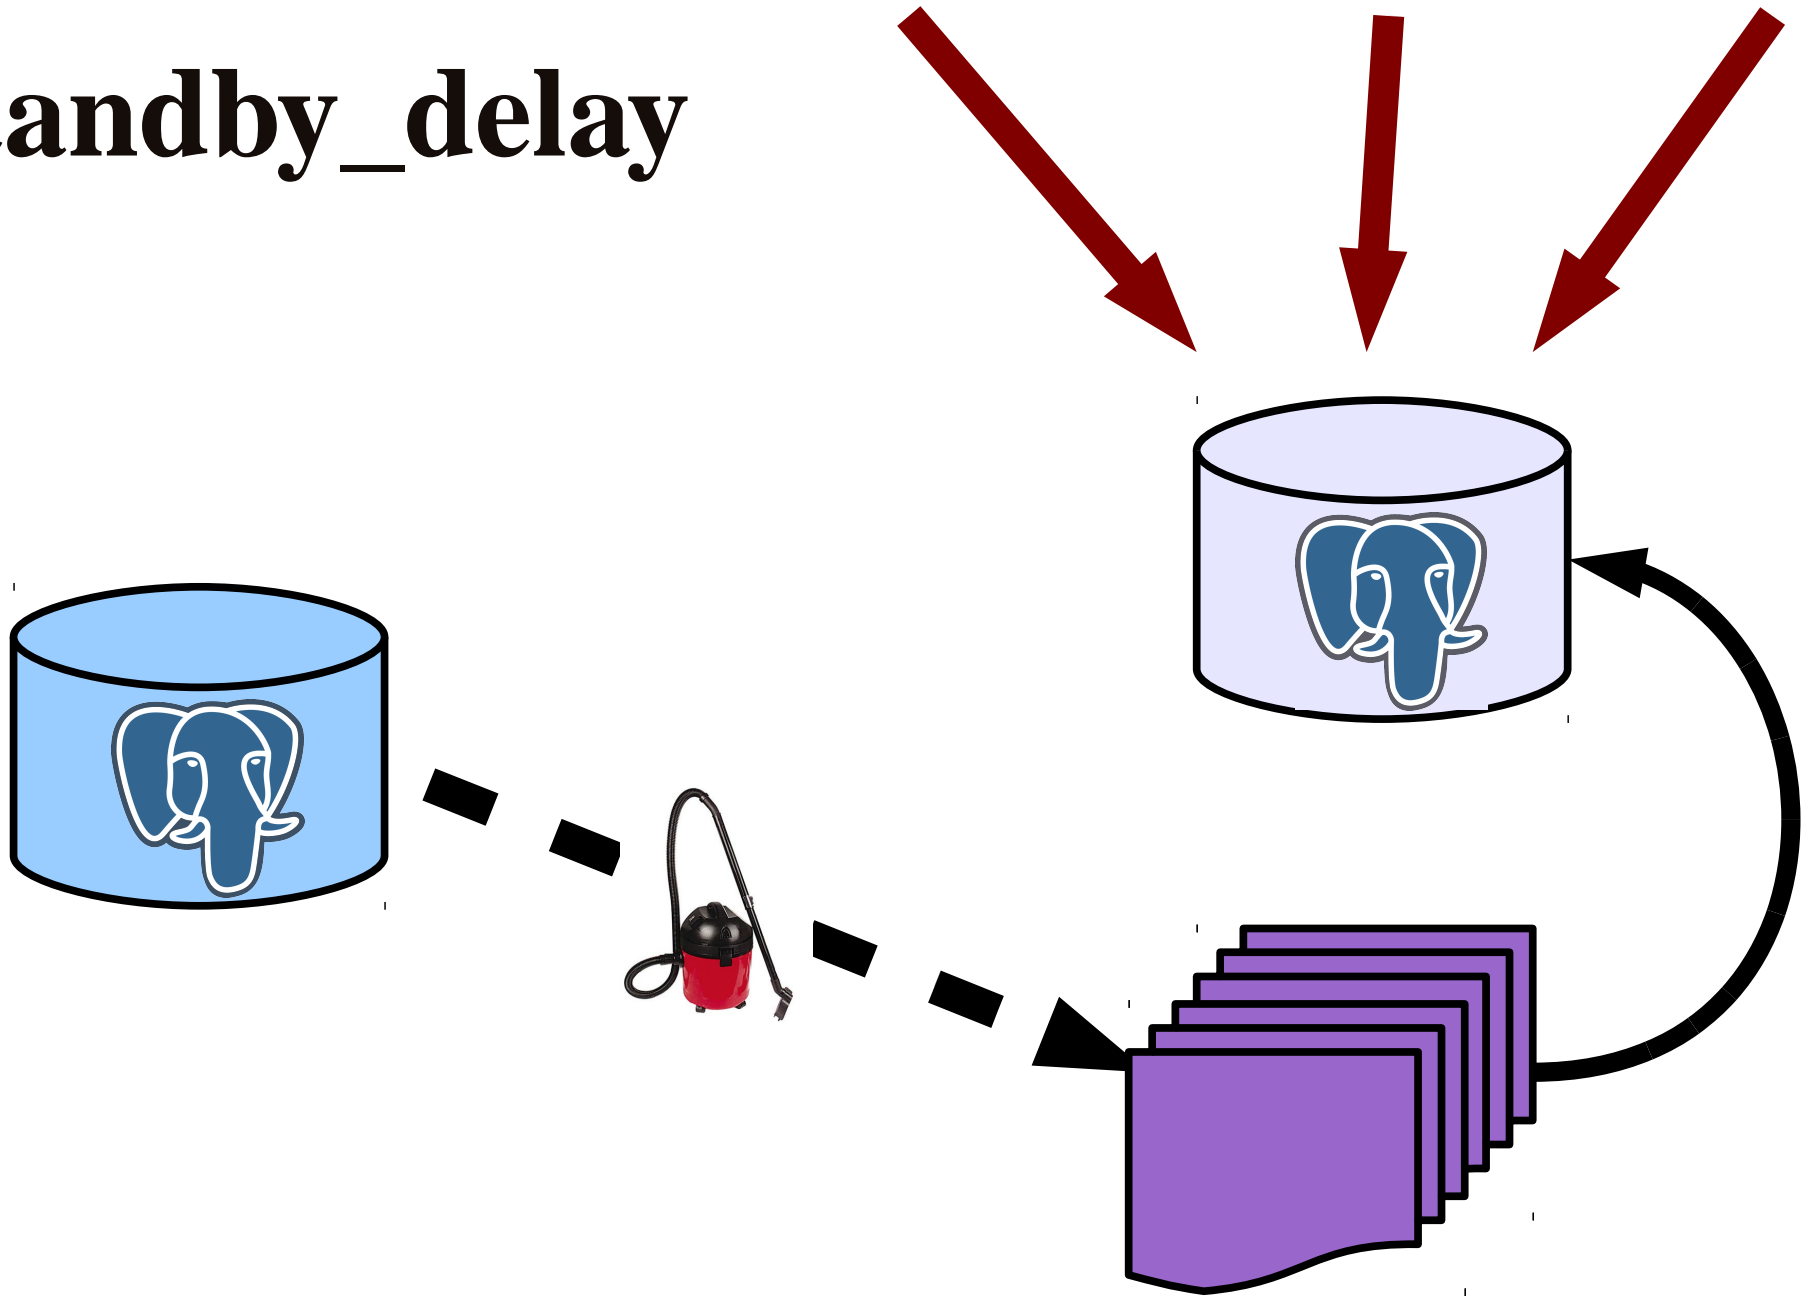

Problems with Hot Standby

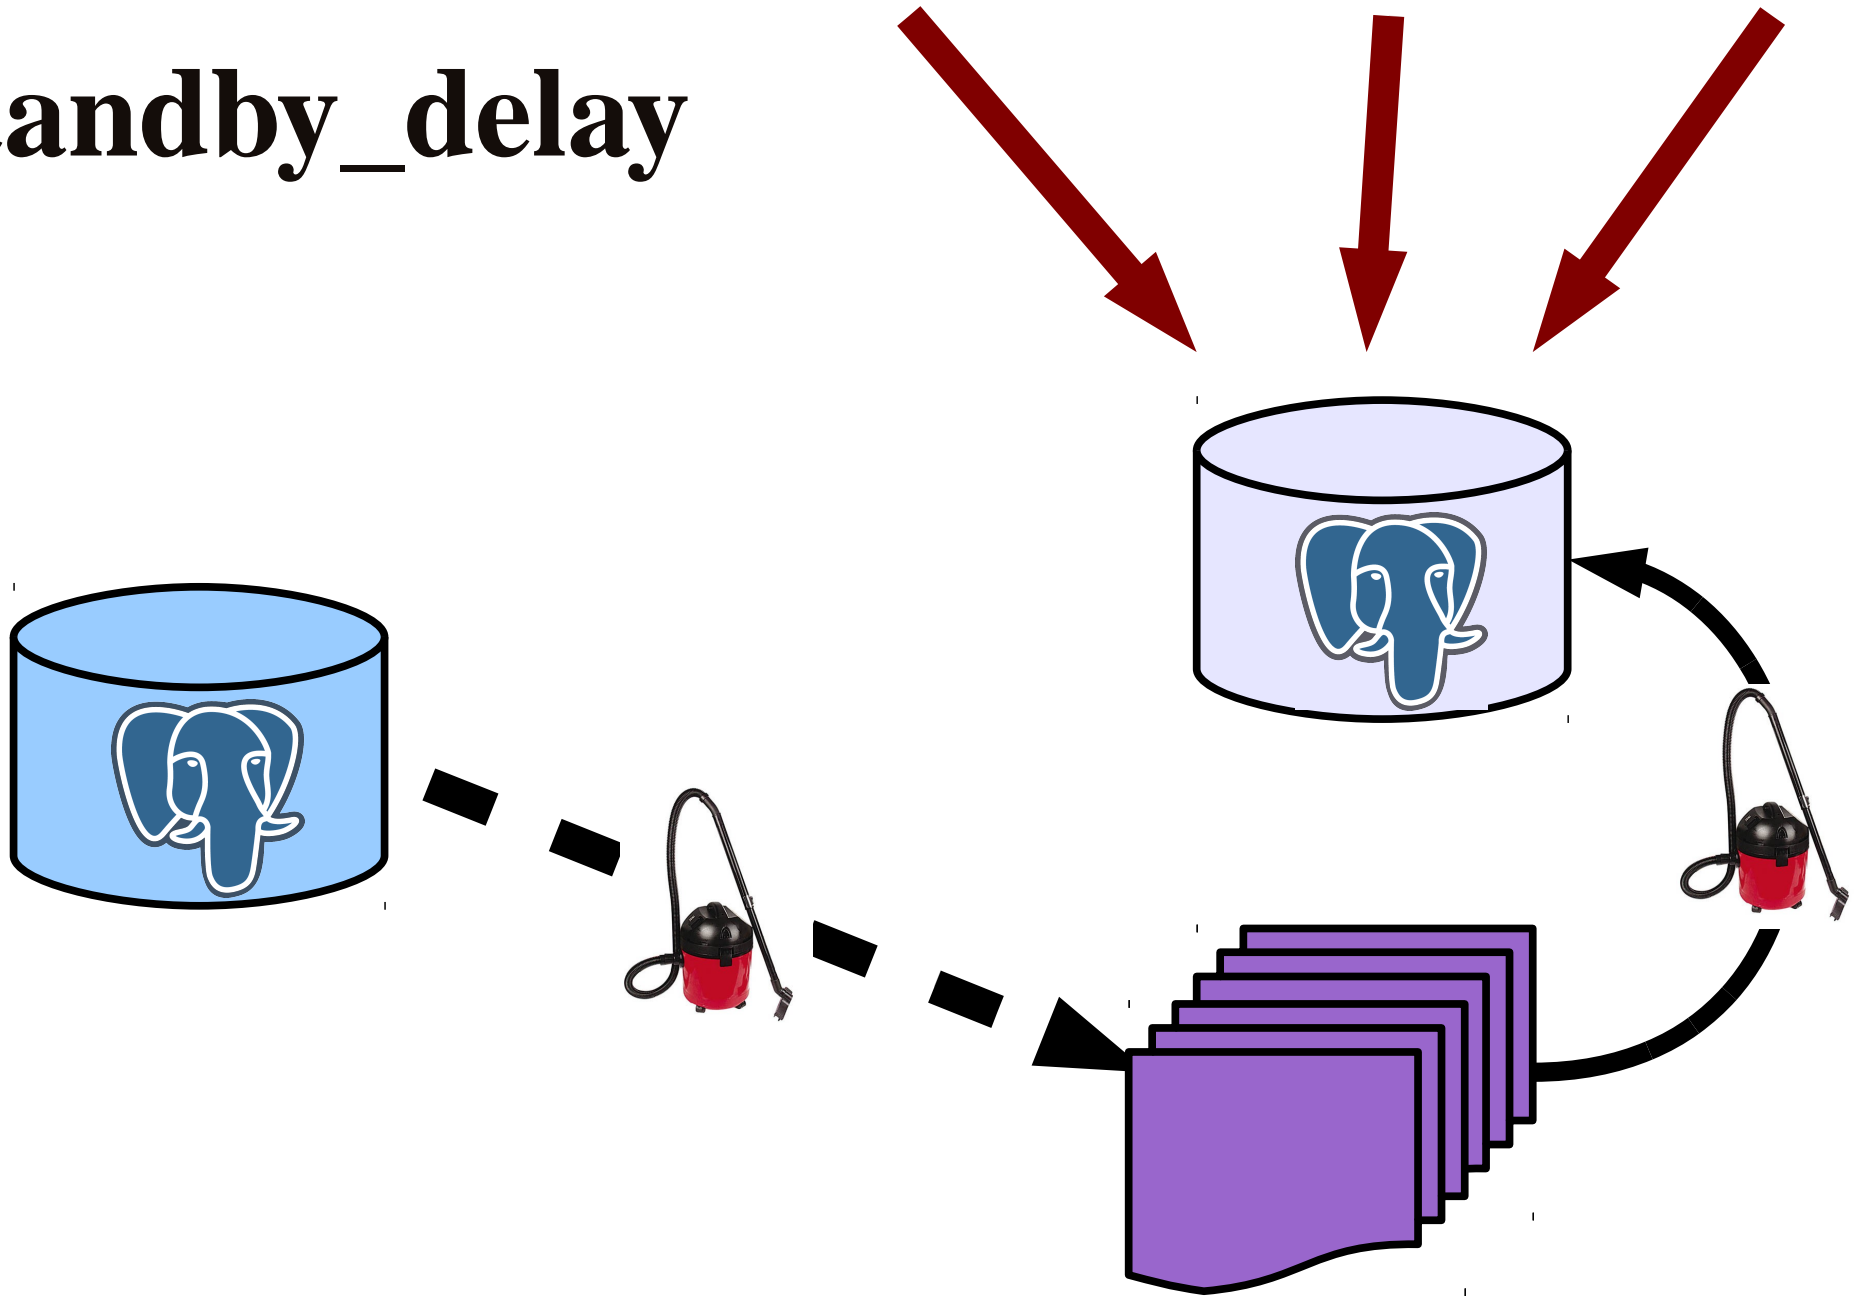

Problems with Hot Standby

standby_delay

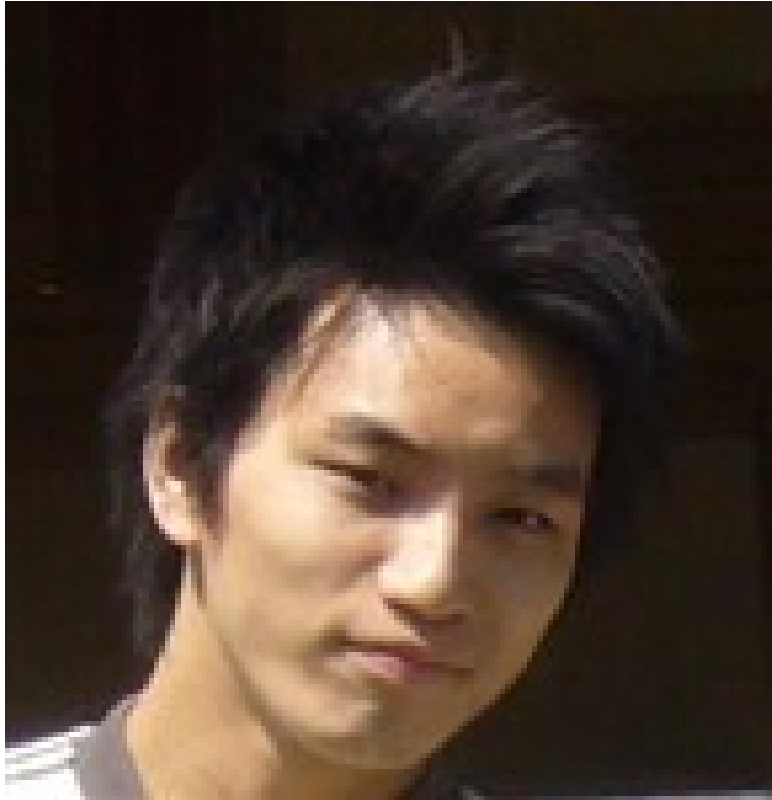

standby_delay

different problems

1. Zero data loss
2. Seconds of downtime (or less)
3. Single-node performance
4. Scalability: *not important*

pgCon 2008:

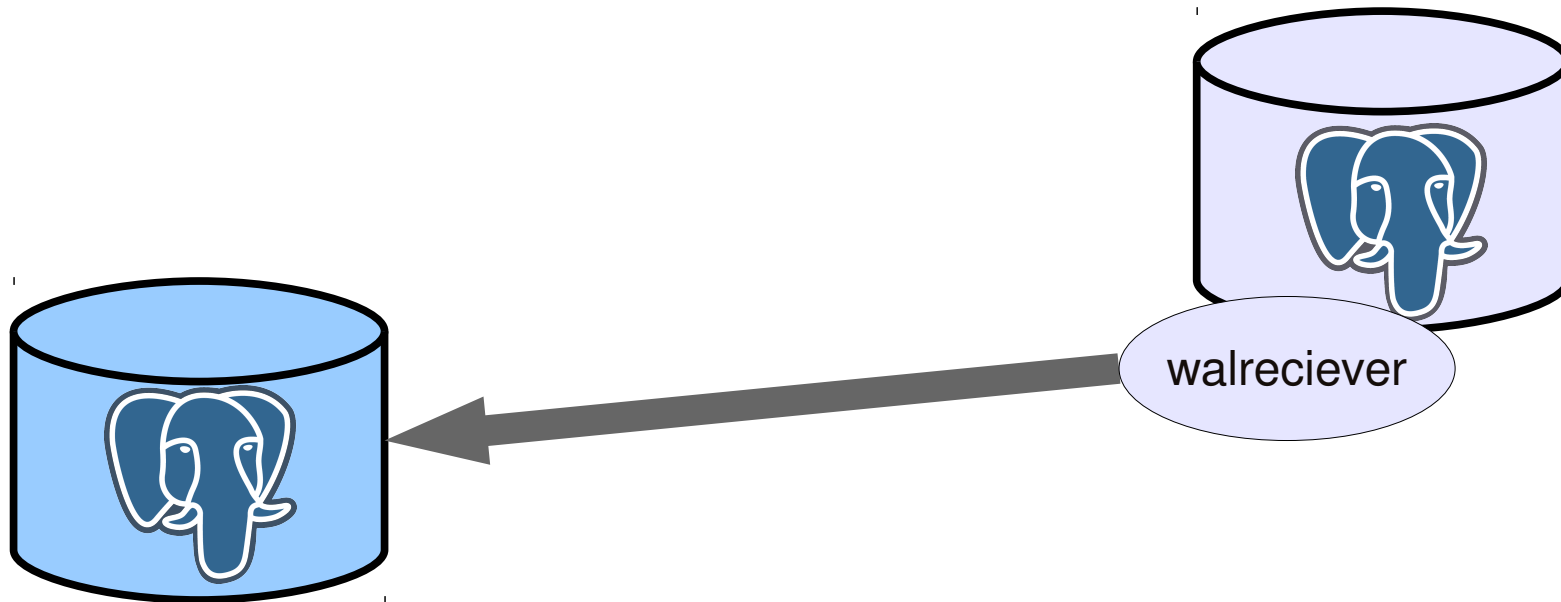

Synchronous Log-Shipping Replication

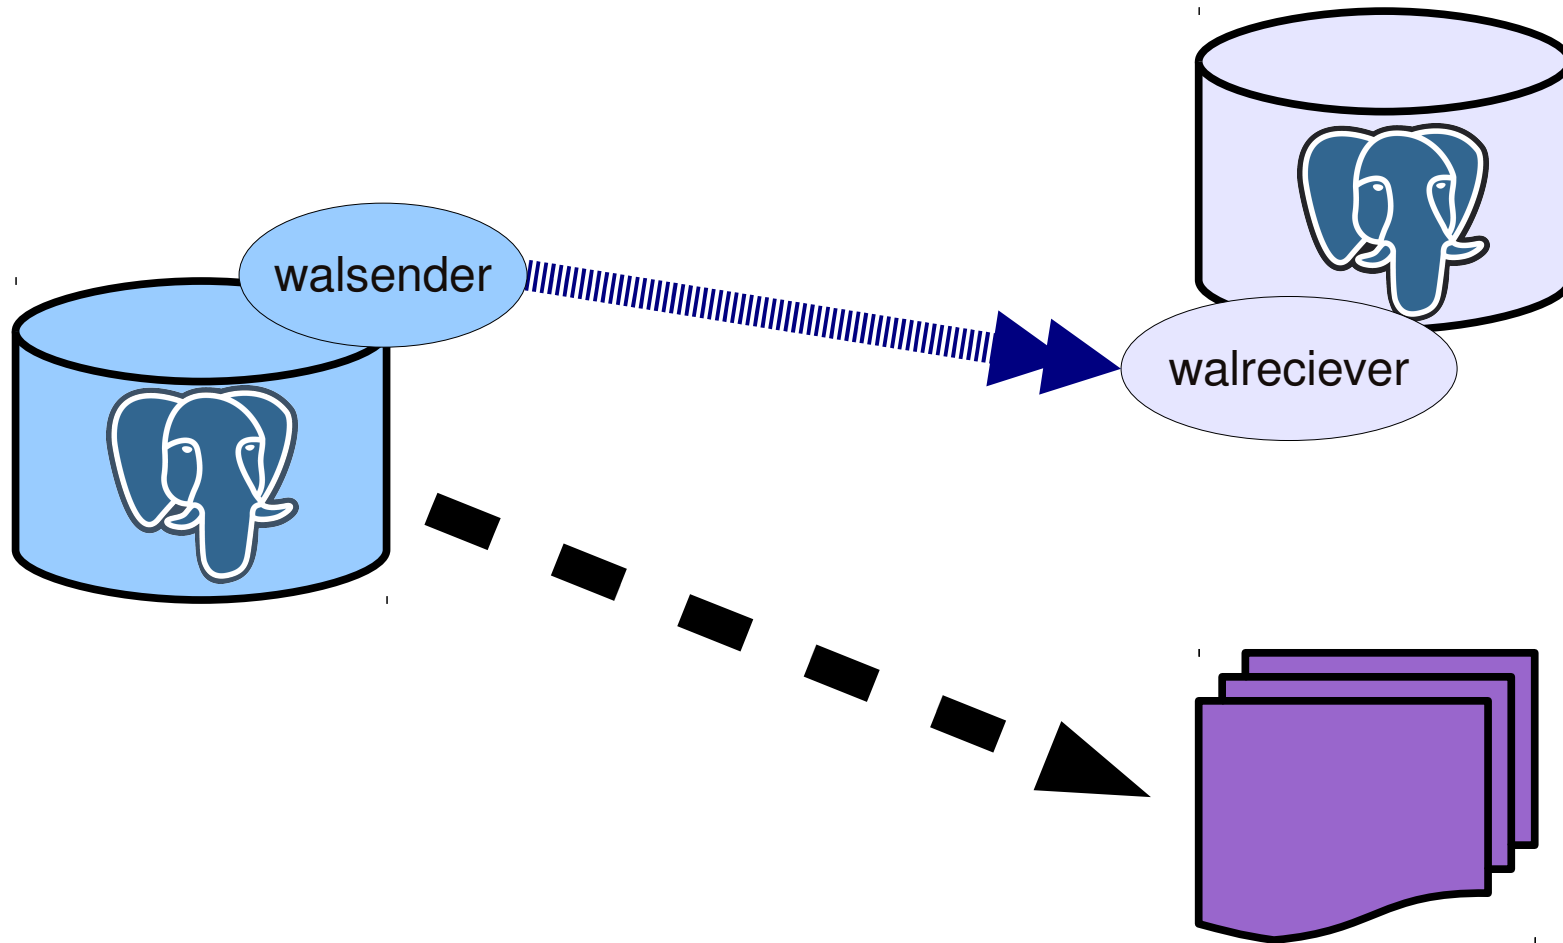

after 18 months:
“streaming replication”

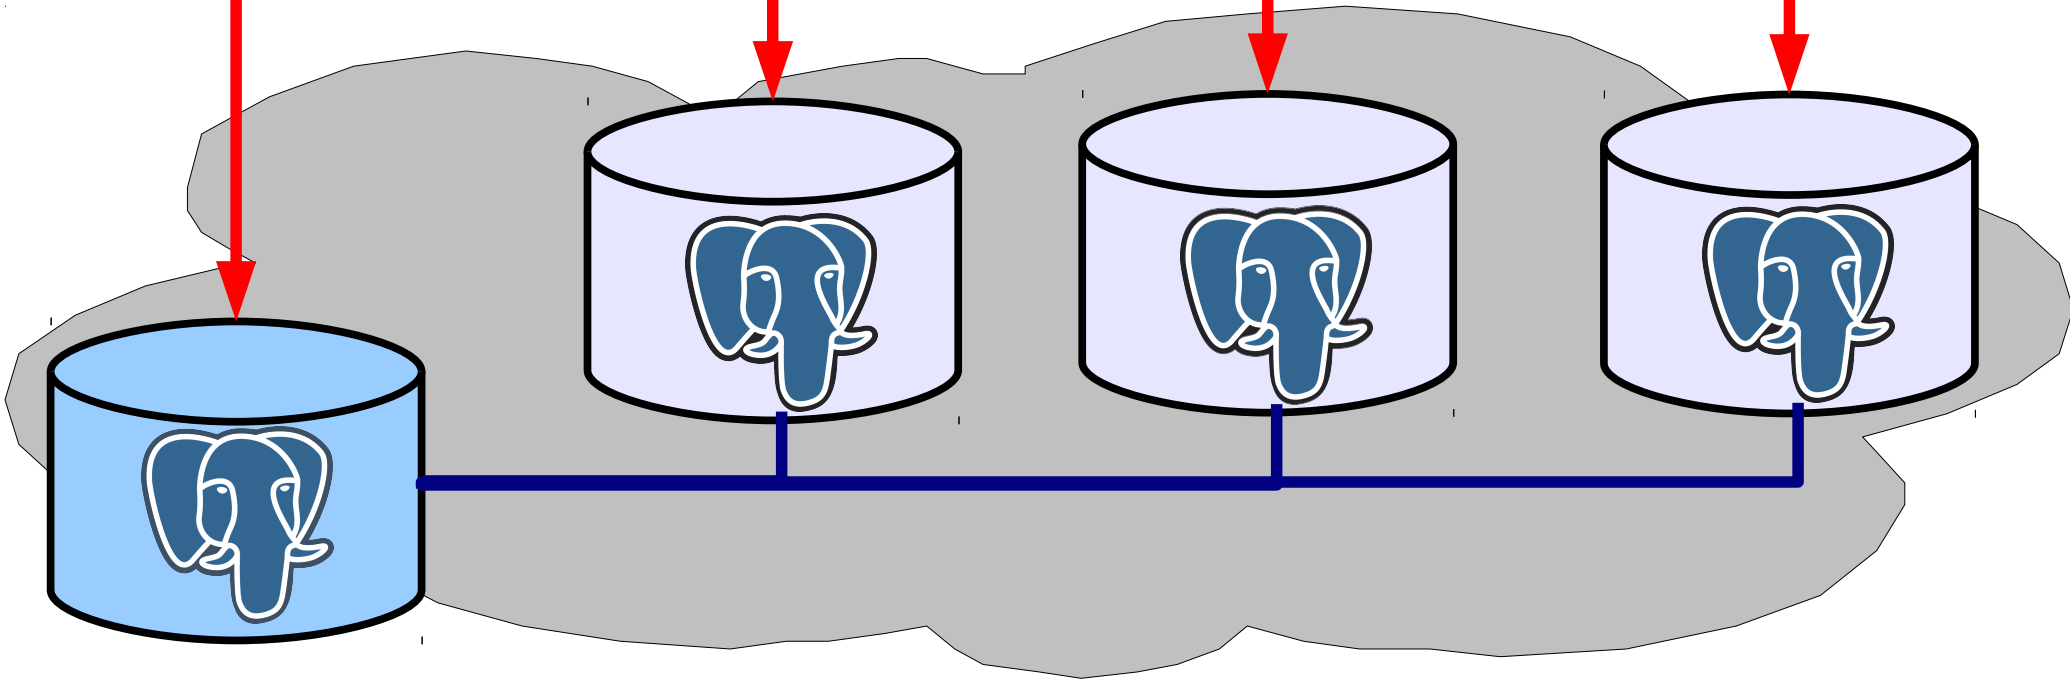

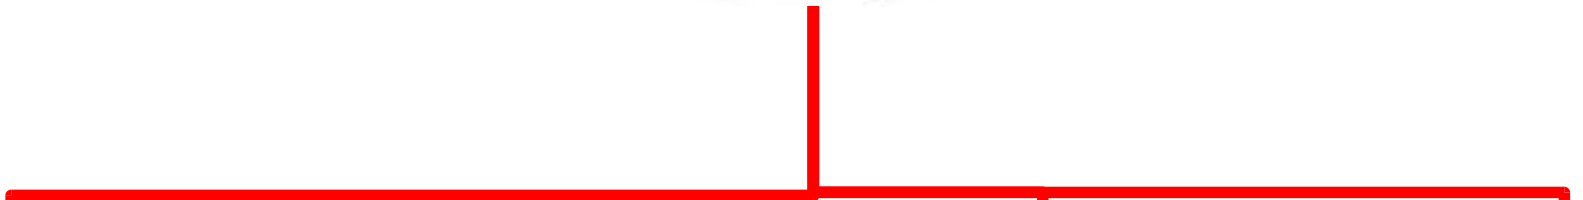

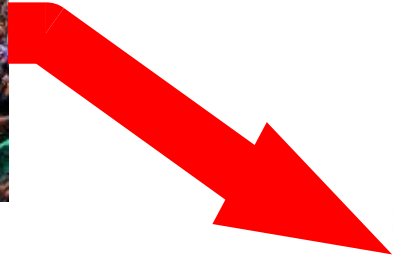

**after 18 months:
“streaming replication”**

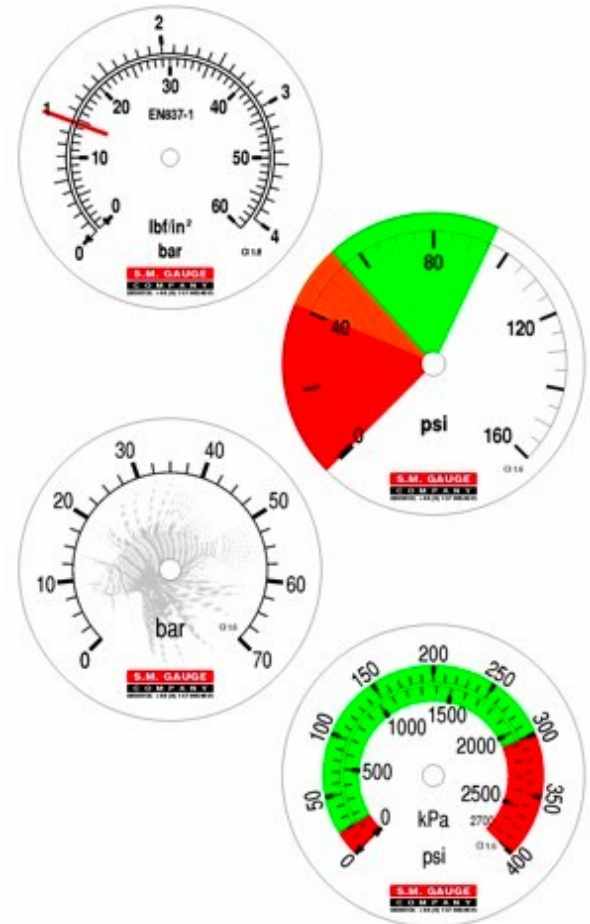

after 18 months: “streaming replication”

tuning dials

- max_standby_archive_delay
max_standby_streaming_delay
- vacuum_freeze_min_age
- max_wal_senders
- wal_sender_delay
- wal_keep_segments

many many features

- windows 64-bit
- pg_upgrade
- RADIUS authentication
- passwordcheck
- grant on all
- default permissions
- deferrable unique check
- ordered aggregates
- new windowing clauses
- conditional triggers
- just DO it!
- PL/perl & PL/python
- named parameter calls
- LISTEN/NOTIFY
- HStore
- exclusion constraints
- join removal
- new explain options
- JSON/XML explain
- new VACUUM FULL

PostgreSQL 9.0 now available!

The most anticipated PostgreSQL version in five years has been released. With built-in binary replication and over a dozen new major features, PostgreSQL 9.0 has compelling reasons to upgrade or migrate for every database user and developer.

[New Patch](#) - [Activity Log](#) - [CommitFest Topics](#)

The most recent three comments for each patch will be displayed below. To view all the comments for a particular patch, or to add a comment or make other changes, click on the patch name.

Status Summary. [Needs Review](#): 30, [Waiting on Author](#): 5, [Ready for Committer](#): 6, [Committed](#): 7, [Returned with Feedback](#): 9, [Rejected](#): 1. [Total](#): 58.

Pending Patches

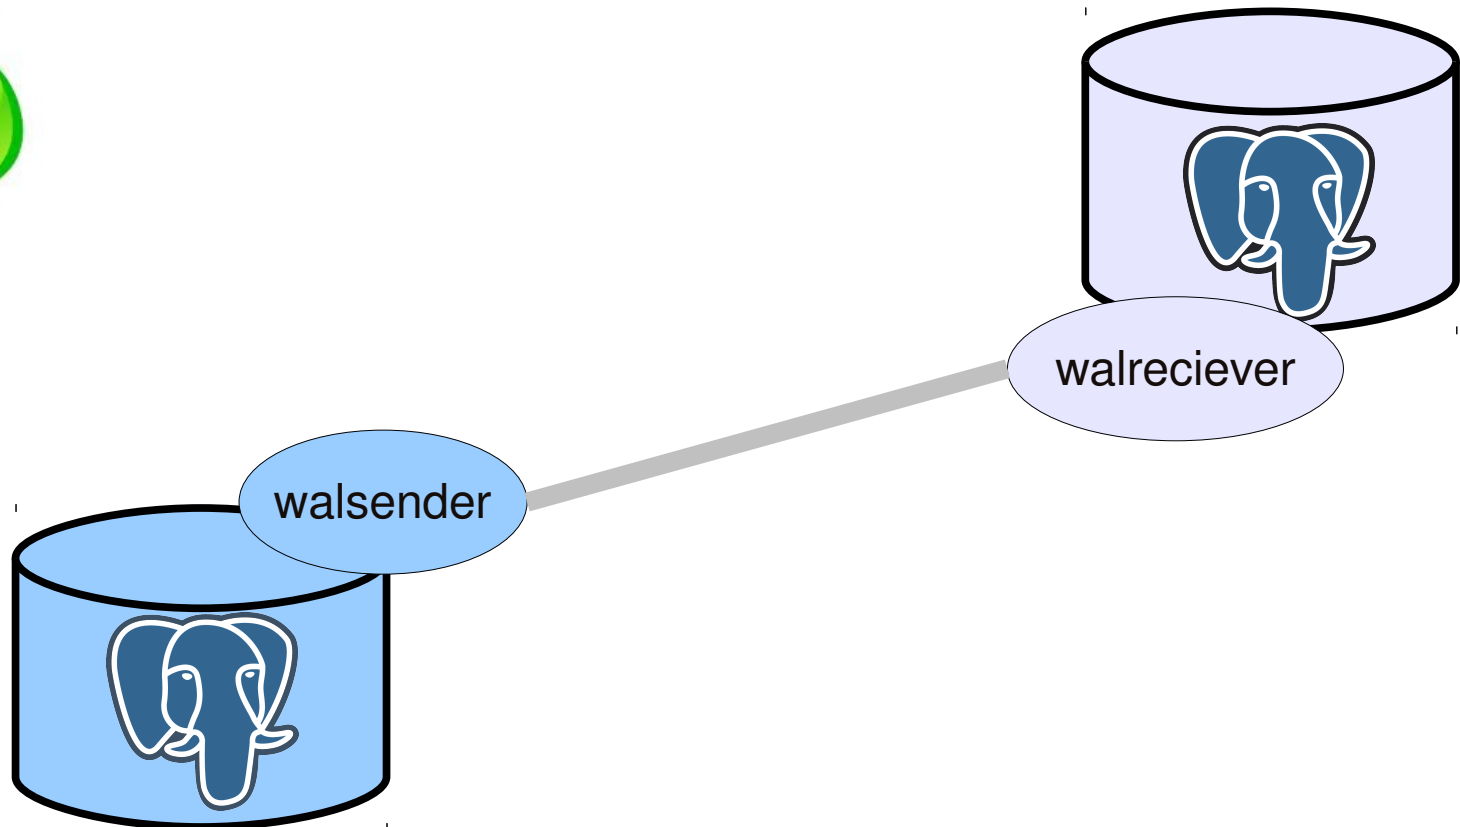

Patch Name	Status	Author	Reviewers	Last Activity
Replication and Hot Standby				
Hot Standby tuning for btree xlog vacuum() Patch by simon on 2010-07-31: Initial version. Comment by simon on 2010-09-19: Will apply in early October if no adverse comments before then. Not a priority for assignment of RRRs	Needs Review	Simon Riggs	Nobody	2010-09-19
Synchronous Replication Patch by MasaoFujii on 2010-09-09: Initial version.	Needs Review	Fujii Masao	Nobody	2010-09-15

features for 9.1

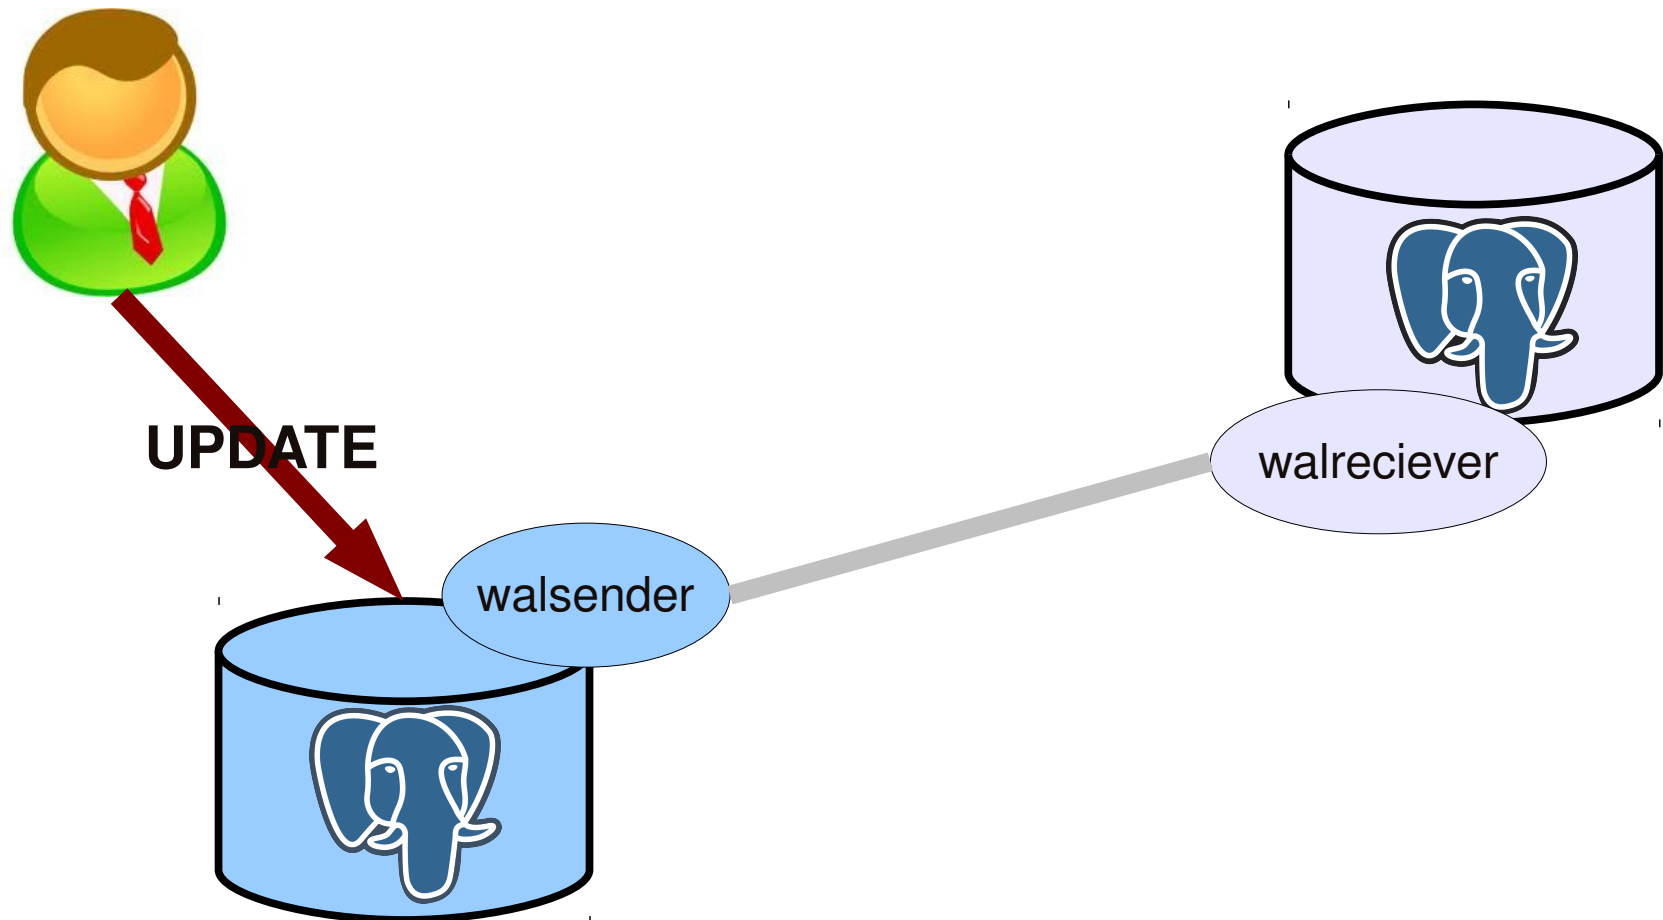

- synchronous replication
- SQL/MED federated tables
- security label support
- per-column collations
- predicate locking
- benchmarking tools
- new XML functions
- KNN GIS indexes
- MERGE
- VIEW triggers
- extensible ENUMs
- progress indicator
- automatic GROUP BY
- writeable CTEs
- JSON support

synchronous replication

anyone can be a patch reviewer

- You don't have to program in C
- You don't have to be a PostgreSQL expert
- You don't need special authorization
- You just need to be able to follow simple instructions:

http://wiki.postgresql.org/wiki/Reviewing_a_Patch

The commitfest is underway! Do it now!
